People are predictable. Every person you encounter, from your prospect to your interviewer to your girlfriend, functions predictably, according to their programming.

If you can learn to read that program – if you can understand how a person thinks – you can use those programs to influence how people think and act around you.

Holly Antle has spent more than a decade specializing in sales and marketing. Car sales, direct sales, insurance sales – Holly has sold just about everything. And as a marketer, she's crafted marketing campaigns and wrote sales copy that boosts sales.

But Holly has a secret side-hustle, one that has given her unique insight into the human brain. For more than 15 years, she's worked as a professional psychic reader, listening to all the secret desires and deepest secrets of hundreds of people from all over the world.
